

Meet Sonawane

AI/ML & Backend Infrastructure Engineer · MLOps

meetsonawane3@gmail.com · meetsonawane.me · github.com/meet447 · linkedin.com/in/meet-sonawane

Summary

AI/ML and backend infrastructure engineer focused on low-latency systems, MLOps, distributed compute, and multi-agent execution. Experience building LLM orchestration platforms, production APIs, and open-source AI tools.

Experience

MLOps Intern — Hooman Digital LLP · Remote · Nov 2025 – Present

- Building LLM inference orchestration across decentralized and centralized GPU pools.
- Architected a SkyPilot-style GPU workload framework integrating multiple compute providers.
- Deployed and scaled LLMs on distributed infrastructure with high availability focus.

Technical Head — E-CELL BVCOE · Sept 2024 – Jan 2025

- Led the technical team for the entrepreneurship cell and tech-driven initiatives.
- Organized 5+ workshops and events for hackathons and startup-building programs.

Selected Projects

Koraku: Self-hostable ReAct agent runtime with isolated 3-tier sandbox routing.

Chipling: Multimodal vector discovery engine using CLIP; 500+ active users.

MeuxCompanion: Self-hosted AI companion with Live2D/VRM, voice chat, and lip-sync.

Achievements

- YC AI Startup School 2026
- Smart India Hackathon National Winner 2024
- OSINT reconnaissance framework acquired by state police department

Education

B.E. Electronics & Telecommunication — Bharati Vidyapeeth College of Engineering

Navi Mumbai, Maharashtra · 2023 – 2027

Core Stack

Python · Go · React · FastAPI · Docker · Kubernetes · Redis · LLM · PostgreSQL
